Hi all.

I've just added to the invite the EPA ppt with added template slides, and the USGS version.

For our first discussion, please review.

Talk soon.

Subject: USGS/EPA meeting prep

Dear all,

Greetings. My name is Jose Zambrana and I am Ramona's special assistant. As you all know, we are prepping for a meeting with USGS on the recent Pavillion results, and then a joint briefing to industry. Since Ramona, Cindy Sonich-Mullin, and Jennifer Orme-Zavaleta are tied up this week with the HF stakeholder meetings, I've been asked to lead in coordinating ORD's efforts to get our briefing materials

prepared, with Alice Gilliland serving as point person for NRMRL, and Linda Sheldon serving as point for NERL. Additionally, it will be critical to work closely with R8, hence Ayn is included here.

Thanks a great deal to R8 for giving us a solid head start. Using what they've put together, we will add to it to address the scientific/statistical basis for consistency across the results (Phase V EPA vs Phase V USGS, and Phase V vs Phase III/IV, both MW01 and MW02), and scientific/technical basis for sampling low yield wells as was accomplished.

To expedite/focus our efforts, I'll be adding some template slides into the current presentation – this will help us answer the kinds of questions that have been coming up lately, and prepare for what we'll need to work through with USGS.

Please expect to receive several invites for conference calls over the next few days. A meeting with USGS is tentatively scheduled for Friday afternoon, so we'll need to brief Ramona prior (on Friday as well).

I look forward to working with all of you. Putting our heads together, I expect we'll be successful in this endeavor!

Best,

Jose
